CARE AND MAINTENANCE TIPS

The Ultimate Auto Protection

INTERIOR

OIL BASED STAINS

(i.e. French Fries) Using a soft bristled brush or sponge, apply a liberal amount of Xzilon™ Spot Remover to the affected area. Blot Upholstery stains. **DO NOT SCRUB**, scrubbing may damage some fabrics. **FOR CARPETS** scrub vigorously with a soft bristle brush. Then wipe clean with a warm damp cloth.

LIQUIDS

(i.e. Coffee, sodas, milk, etc.) Blot up liquid spills as soon as possible using absorbent cloth or sponge, Dilute the spill with water and continue to blot up, until dry.

WAXY MATERIALS

(i.e. Crayons) Place several layers of tissue or an absorbent paper, such as a paper bag, over the stain. Place an iron over the paper. This will draw the wax away from the upholstery. Once the crayon is removed, apply Xzilon Spot remover with a sponge and blot up remaining crayon.

INK STAINS

Spray affected area with hair spray. Blot area with a soft sponge. Then, wipe area clean with a warm damp cloth. To maintain leather and vinyl surfaces, apply Xzilon Mink Oil Leather/Vinyl Protector as often as needed.

EXTERIOR

WASHING

Dilute Xzilon Wash and Wax Shampoo in water. See dilution instructions on rear of container. Using a soft clean cloth, wash vehicle in sections continually rinsing cloth in shampoo/water solution. Spray vehicle with clean water, periodically to remove excess shampoo. Do not wash vehicle in direct mid day sun. Always wash vehicle in shaded area. Wash vehicle as often as needed.

AUTOMATIC CAR WASHES

Brushless systems are preferred. Car Wash Systems using "bristle" brushes may scratch painted surfaces.

WAXES AND CLEANERS

Your Xzilon treated surface requires no additional waxing or polishing. Some polishing compounds may damage your Xzilon treated surface.
